

Pitch Deck

Gara Bike

Gara Systems PLC
Transforming Sharing!

July 2025

The infographic features a central hub on the left, which is a circle with a green border and an orange-to-white gradient. Four orange lines radiate from this hub to four separate grey rounded rectangular boxes on the right. Each box contains a numbered circle (1-4) and a text description of a transportation problem. The problems are: 1. Traffic congestion & long commute times, 2. Rising air pollution & CO₂ emissions, 3. Limited affordable & sustainable transport options, and 4. High reliance on motorized vehicles.

THE PROBLEM

We're solving

1

Traffic **congestion** & long commute **times**

2

Rising air **pollution** & CO₂ **emissions**

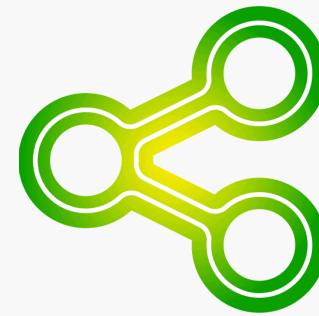

3

Limited **affordable** & **sustainable** transport options

4

High **reliance** on **motorized** vehicles

THE SOLUTION

Gara Bike

Ethiopia's Leading
Bike-Sharing Service

Green, efficient, sustainable, healthy and affordable transportation

Technology-driven system, Mobile app, QR-code access enabled with cashless payments and human-centered design

300 Dockless Bikes strategically located across 30 parking zones

Target Market

Daily commuters,
Students,
Tourists & Visitors,
Corporate &
institutional partners

MARKET OPPORTUNITY

SAM

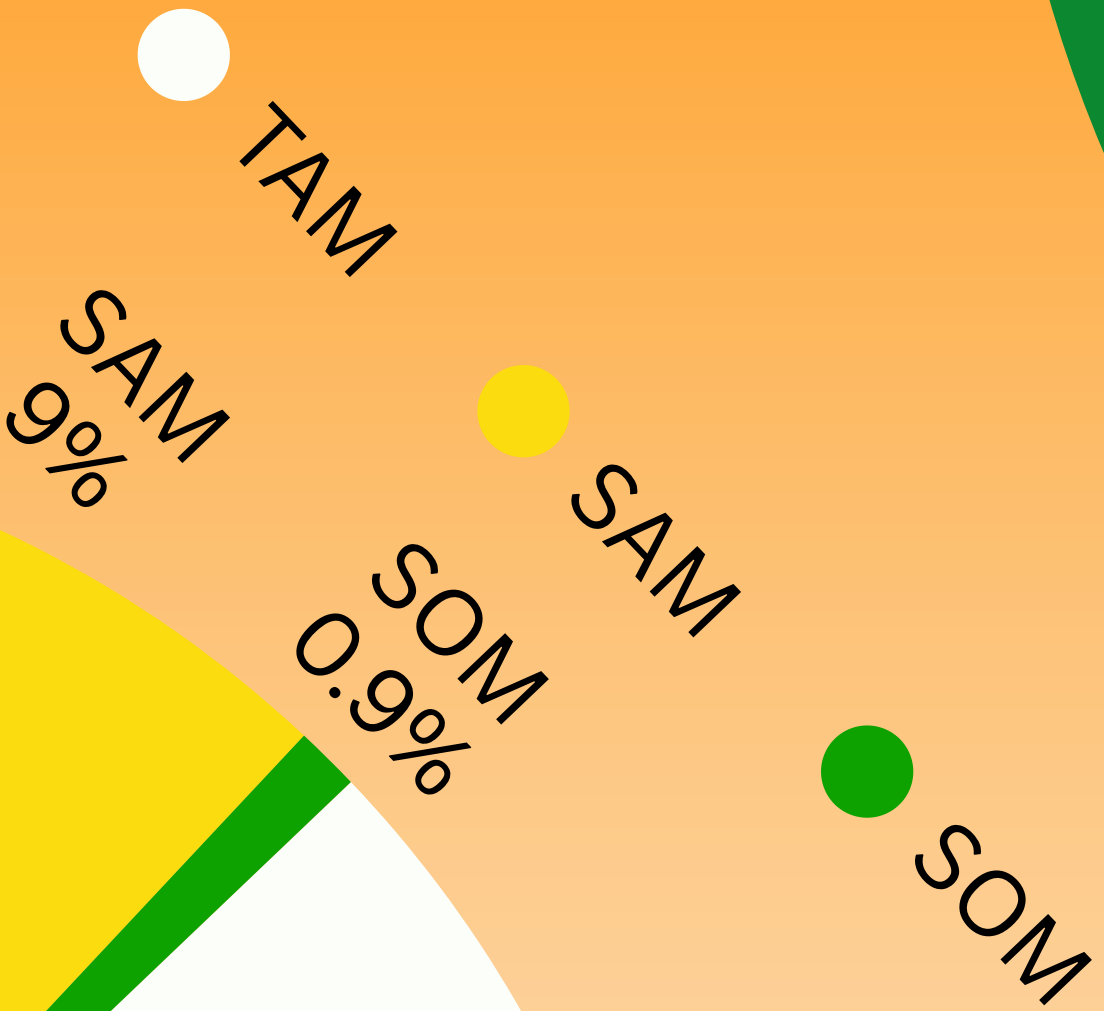

(Serviceable Available Market)

Initial focus: high-traffic areas
(Arat Kilo, Mexico, Megenagna,
Bole, & Meskel Sq.)

TAM

(Total Addressable Market)

Addis Ababa's 5M+
population with
growing demand for
affordable transport

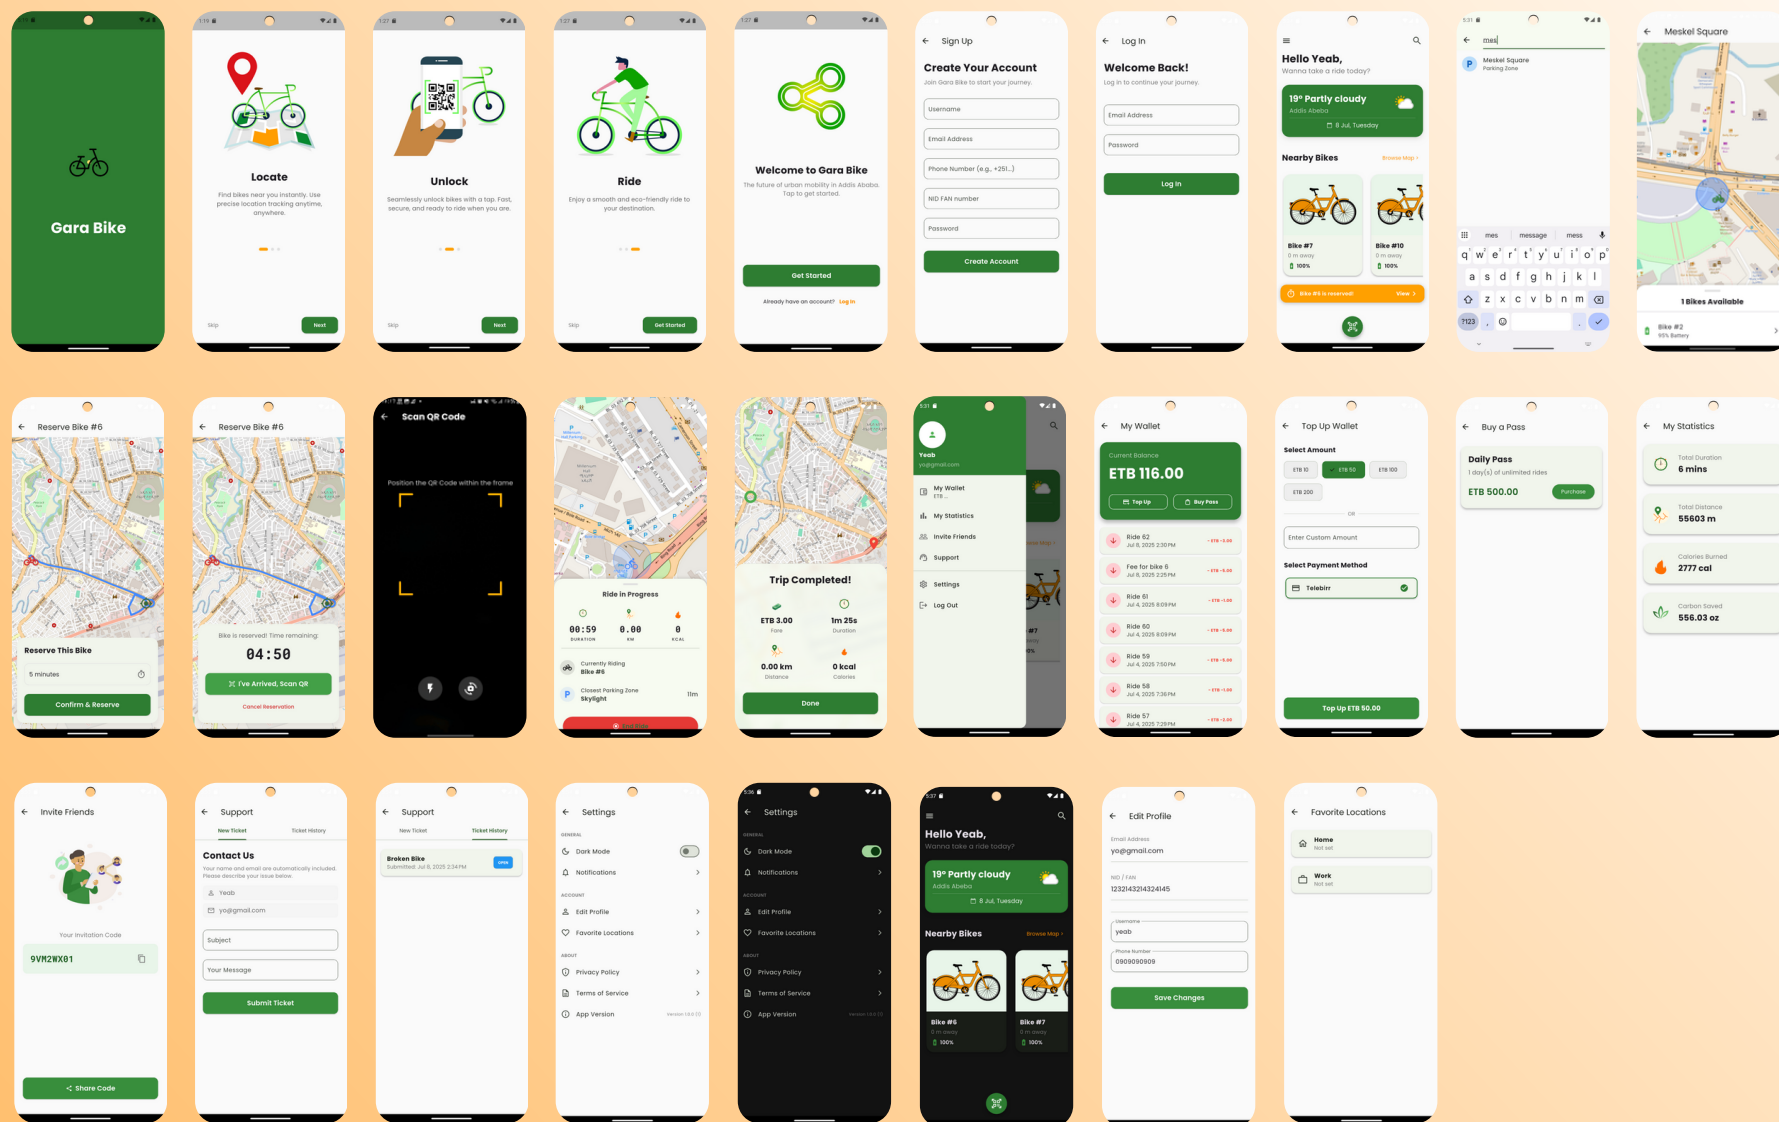

Gara Bike

SOM

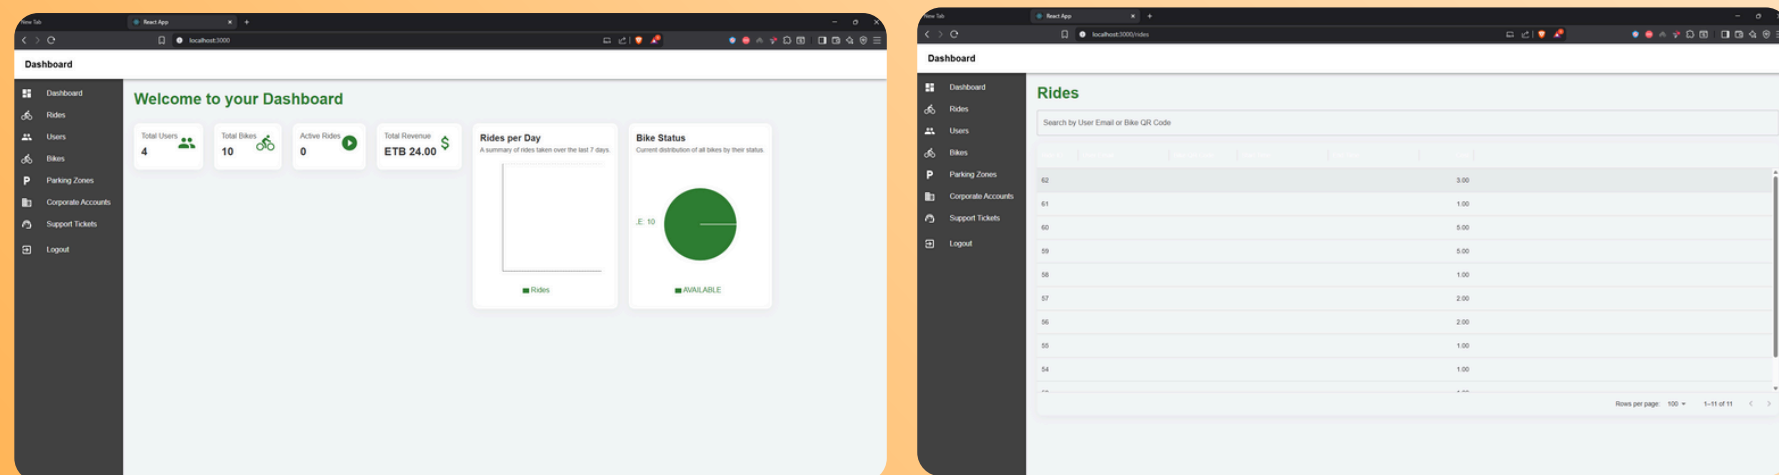

(Serviceable Obtainable Market)

Targeting early adopters: ~50K monthly
users, primarily students, young
professionals, and low-income
commuters using public transit.

MVP

UI/UX DESIGN

DASHBOARD

Current Status

MVP 1 COMPLETE

Mobile app (iOS/Android)

Back-end dashboard

Business plan & go-to-market plan

In Progress:

Access-to-finance partnerships & outreach

MVP 2 (hardware + IoT lock integration)

Next Steps

 **Pilot Launch**

Finalize MVP 2 & software integration

Soft launch: 50-100 bikes in target zones

Collect usage data & user feedback

Official Rollout

Scale to 300-500 smart bikes

Expand into additional corridor routes

Launch subscriptions, pass packages & partner offers

WHY NOW?

Favorable Market Conditions

**Addis Ababa's
rapid urbanization &
population growth**

**Government interest in ,
micro-mobility solutions &
bicycle sharing operators**

**Bike Lane Corridor
Infrastructure**

**green transport &
sustainability**

**Global trend toward shared
mobility solutions**

BUSINESS MODEL

35% Pay-per-ride fees

20% Subscription plans (daily, weekly, monthly, annual)

30% Corporate partnerships & institutional subscriptions

15% Advertising & sponsorships (on bikes, docks, app)

UNIT ECONOMICS

Projected based on pilot assumptions

- Acquisition cost (CAC): ETB 200-600/user
- Lifetime value (LTV): ETB 1,200-2,400/user
- Payback period: 2-4 months

GO-TO MARKET STRATEGY

Customer Acquisition

- Digital marketing (Social media, influencers)
- Kiosk advertising
- Local Community Engagement & Cycling Events
- Strategic Partnership with Universities, Schools, Corporate, Parks, etc.

Customer Retention

- Loyalty Programs, Discounts, Referral Rewards
- Regular Maintenance & 24/7 Customer Support
